🎓 Education

Xian Jiao Tong University (XJTU), Shaanxi, Chinese Mainland   2022 – Present

Second Year Undergraduate in Quantitative Economics and Finance, Jinhe Center for Economic Research, expected June 2028
First Year Undergraduate in Mathematics, School of Mathematics and Statistics, 2024-2025
Pre-College Student of Young Gifted Program, 2022-2024

♡ Honors and Awards

First-Class Scholarship   2024-2025
3rd *Prize*, Award on school-level MCM/ICM   Jan. 2025
Successful Participants, Award on MCM/ICM   Jan. 2025
2nd *Prize*, Award on school-level "21st Centry Cup" National English Speaking Competition   May. 2025

📕 Learning Experience

Average Score & Ranking
87.92, 54/193 (Top 30%)   in Young Gifted Program, XJTU, 2022-2024
87.81, 3/109 (Top 3%)   in School of Mathematics and Statistics, XJTU, 2024-2025
Relevant Courses: Mathematical Analysis I (90), Mathematical Analysis II (86), Advanced Algebra II (93), Mathematics I (94), Mathematics II (94).
Learning Courses: Principles of Economics, Accounting, Applied Statistics, Mathematical Statistics, Probability Theory.
Self-studying courses (ongoing & completed): International Trade, Intermediate Microeconomics, Mathematical Economics, Economic Growth.

👤 Self-assessment

I possess immense enthusiasm and a keen interest in **economic growth theory, the impact of comparative political systems and cultural institutions on the development of different economies**, as well as **the role of public policies and fiscal regulation in macroeconomics**. Meanwhile, I look forward to delving into the specific applications of **real analysis, functional analysis, and advanced probability theory** in the field of economics.

Equipped with a solid mathematical foundation and strong mathematical literacy, I have accumulated relevant experience and systematic training in literature retrieval, reading, and review. Additionally, I possess strong self-motivation and rapid learning ability, and I always aspire to translate the knowledge I have acquired into practical capabilities for solving specific economic problems, while committing to the construction and research of more abstract economic theories.
